## OTHER COMPETENCES

GOOGLE ANALYTICS ACADEMY  
Google Analytics for Beginners

ORACLE UNIVERSITY  
Oracle Cloud Infrastructure Foundations  
Associate

## WORK EXPERIENCES

### Internship, Frontend-developer, The Council

Stockholm, january 2021 - july 2021

- Part of my education with Changemaker Educations to become a web developer in E-commerce
- During the pandemic The Council needed to move their courses online. I helped with connecting their website and the platform where the courses were located
- For customers to find the courses I added the Utbildningar (Educations) option to the navbar, made a submenu with links to all the different courses. On the course pages I had to individually shape them after the company's theme as well as add forms so customers could contact the company about their interest in the course
- Updated their website with new posts about the business so customers can read about news and events

### Internship, Backend-developer, NordLEI

Stockholm, january 2021 - july 2021

- Part of my education with Changemaker Educations to become a web developer in E-commerce
- It focused on web- & webserver programming which was decided with my internship, where my skills were suited NordLEI's current projects
- Trimmed SEO for a onepager which made it load faster and fit preferred parameters
- Created admin portal from scratch, for a partner company, where info to a database could be edited, created and even removed in order to more easily manage the backend part of the company
